

Since 2010, the State Enterprise “Research and Production Centre for Geology” has been training highly qualified specialists in the following specialities:

25.01.01 “General and regional geology”

25.01.02 “Palaeontology and stratigraphy”

25.01.03 “Geotectonics and geodynamics”

25.01.04 “Petrology, volcanology”

25.01.06 “Lithology”

25.01.07 “Hydrogeology”

25.01.09 “Geochemistry, geochemical methods of mineral prospecting”

25.01.10 “Geophysics, geophysical methods of mineral prospecting”

25.01.12 “Geology, mineral exploration and prospecting of oil and gas fields”.

Postgraduate students can enrol on full-time courses and correspondence courses.

Postgraduate students applying to the State Enterprise “Research and Production Centre for Geology” for a PhD degree are offered courses in five specialities:

25.01.01 “General and regional geology”

25.01.03 “Geotectonics and geodynamics”

25.01.06 “Lithology”

25.01.09 “Geochemistry, geochemical methods of mineral prospecting”

25.01.12 “Geology, mineral exploration and prospecting of oil and gas fields”.

The training of highly qualified specialists of the State Enterprise "RPC for Geology" is carried out on the scientific base of the branch "Institute of Geology", which meets all requirements for establishments providing postgraduate education.

Upon successful completion of a course, a postgraduate student obtains the scientific qualification “Researcher in the field of geological and mineralogical sciences”.

Applications to the State Enterprise "RPC for Geology" for a postgraduate course are open for entry from **August 1st to September 30th** at 7 Kuprevich St, office 228.

Entry Requirements for Foreign Citizens

Postgraduate courses for foreign students are taught **in Russian**.

To apply for a course, foreign citizens should submit:

- a Master's degree;
- an ID card;
- a document confirming the right to stay on the territory of the Republic of Belarus;
- medical insurance.

The training period is 3 years for a full-time course and 4 years for a correspondence course. If an applicant doesn't have an appropriate level of Russian, the training period can be extended by a year.

The tuition fee per person is approximately \$2000 a year.

If you are interested in the programme, send in your application form to the State Enterprise "RPC for Geology".

**Information on the Republican Unitary Enterprise
“Research and Production Centre for Geology”
(State Enterprise “RPC for Geology”)**

The State Enterprise “RPC for Geology” has been accredited as a scientific organization (the certificate is valid until December 19th 2023). The activities of the State Enterprise “RPC for Geology” involve the geological study of natural resources, including regional scientific facilities for mineral prospecting, training highly qualified specialists in 9 specialities in the field of geological and mineralogical sciences, editing and publishing the scientific journal “Lithosphere”. The institute specializes in carrying out research and implementing results in the field of natural and technical sciences.

Scientific functions are performed by the branch “Institute of Geology”. The branch “Institute of Geology” of the State Enterprise “RPC for Geology” consists of 58 specialists, including 54 researchers.

The State Enterprise trains highly qualified specialists in 9 specialities in the field of geological and mineralogical sciences. After completing a course, postgraduate students acquire the qualification “Researcher in the field of geological and mineralogical sciences”.

The State Enterprise “RPC for Geology” has a permanent body (the Council for the defence of dissertations K 12.01.01) responsible for awarding PhD degrees in geological and mineralogical sciences in the specialities 25.01.01 – “General and regional geology” and 25.01.09 – “Geochemistry, geochemical methods of mineral prospecting”.
